Substantive knowledge:

Human & Physical Geography
Identify seasonal and daily weather patterns in the United Kingdom

Previous learning from EYFS: Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts, and maps. Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.

In the UK there are 4 seasons, with 4 different weather types: summer, autumn, winter and spring

Summer - hotter, less rain,
possible thunderstorms,
lighter evenings, longer days

Spring - warmer, flowers start
growing, lambs born

Autumn - gets colder, leaves
fall from deciduous trees

Winter - cold, wet, windy, icy
snow could fall, shorter days

There are 12 months of the year: January, February, March, April, May, June, July, August, September, October, November, December

temperature:
how hot or cold it is

season:
a time of the year with a
particular type of weather

Weather can change
Different types of
weather: rain, sun,
wind, snow, cloudy,
fog, mist,
thunderstorm

weather forecast: explaining what the weather will be like

Geographical Skills

- observe and record seasonal changes (to flowering plants and deciduous trees) in the school grounds and local areas.
- collect quantitative data - data on their favourite season.
- take digital photos (e.g. of buildings in the locality, things seen on a bus journey)
- use simple fieldwork and observational skills to study the geography of their school and its grounds
- Collecting and sorting natural objects to investigate their properties
- Making annotated drawings to show variations.

Launch Lesson

- What are the 4 seasons?
- What changes happen around our school as the seasons change?
